

# TREES FOR SCHOOLS

**175,000**

trees planted so far!

## What we do...

**WCAFI (World Clean Air Forest Initiative) is a non-profit organisation with a goal to clean the air by fighting climate change, deforestation, pollution and supporting sustainable livelihoods.**

We do this by planting trees funded by our *Clean Air Tree Kit*, a tree growing kit that contains everything you need to grow and plant your own tree at home. The kit is made from potato waste and is 100% biodegradable. For every donation WCAFI receives for a *Clean Air Tree Kit*, WCAFI plants another tree in a developing country, so you plant one and WCAFI plants one as well.

### Clean Air Tree Kit features:

- Tree growing kit with 6 to 10 seeds
- 100% biodegradable packaging
- Unique PIN code to register online
- See all the trees on our map
- Each tree has a web page

## What your school can do...

**The *Clean Air Tree Kit* is perfect for education and fundraising for your school. Get involved by growing trees to help our environment and learn about all the benefits they give our planet and your community.**

### A project based learning tool

- Ideal for environmental, cultural, ICT, and nature education
- Grow and care for the trees until they are ready to plant
- Use the PIN code to register online, add a name and message to your tree
- Tell us where you will plant and we'll plot your tree on our map
- See where we plant all the other trees in developing countries
- Twin your tree with another tree in Malawi or Haiti
- Plant your trees in your school or in a local forest
- Rewards and points programs available

### Use the *Clean Air Tree Kits* for fundraising

- A great educational program at no extra cost to your school
- Ask for donations from parents and or companies
- 40% or more of all funds raised can be used for school projects
